

Putting a Price on Carbon: The Social Cost of Carbon in U.S. Climate Policy

Superstorm Sandy clean-up, rising food prices, increased heating and cooling costs: we can no longer ignore the direct economic impact of climate change on our day to day lives. Estimating costs of climate change damages informs rule-makers of the benefits of implementing climate change policy. How do policy-makers calculate the costs and benefits associated with carbon emissions reductions?

In collaboration with the **Pace Energy and Climate Center**, the **Bard Center for Environmental Policy** is excited to host an expert panel on the Social Cost of Carbon, an estimate of the economic damages associated with small increases in carbon emissions. Please join us to discuss the stark reality of climate change impacts facing the U.S. economy, how the SCC measures the benefits of proposed climate change regulations, and the implications of using the SCC in U.S. climate policy.

A PANEL DISCUSSION

THURSDAY, MAY 9TH FROM 6PM - 8PM

GLASS MOOT COURT ROOM, PACE LAW SCHOOL, WHITE PLAINS, NY

Remarks by Dr. Eban Goodstein, Director, Bard Center for Environmental Policy

DR. LAURIE JOHNSON

Chief Economist
Climate & Clean Air Program
**Natural Resources Defense
Council**

DR. ROBERT E. KOPP

Associate Director
Rutgers Energy Institute
Assistant Professor
Department of Earth &
Planetary Sciences
Rutgers University

MICHAEL A. LIVERMORE

Executive Director
Institute for Policy Integrity
Adjunct Professor
NYU School of Law
